Concentration _____

Account for any overfill in bags, or include overfill test.

Comments: _____

Note: Absence of a formula worksheet with submission may cause a delay in analysis.

Instructions for Submitting a Compounded Preparation for Testing

1. Determine your minimum required sample size (see minimum sample requirements above).
2. Complete a Sample Submission Form for each sample. Include a formula worksheet for all preparations requiring a chemical test. Absence of a formula worksheet for your compound will delay testing.
3. Ship your preparation, suitably packaged, to Eagle.
 - We suggest that you use overnight shipping so that you can track your shipment.
 - For preparations that are temperature sensitive, send in a cool pack container.
 - Be sure to properly package to prevent leaking or breaking. Make sure all vials or syringes are capped securely.
 - Ship to: [Eagle Analytical Services](#)
Attn: Sample Submission
Unit 1, 73 Beauchamp Rd. Matraville, NSW 2036
 - International Customers should add the following:
 - Clearly mark on the shipping documents: "PHARMACEUTICAL SAMPLE FOR ANALYSIS ONLY – NOT FOR HUMAN USE"
 - Give the shipment a value of \$10.00
 - Send tracking number to info@pccarx.com.au
4. At the conclusion of all of your tests, Eagle will issue a final laboratory report and invoice.
